# Galvanized Scaffolding Coupler Essential for Steel Construction

Our Product Introduction

## Basic Information

- Place of Origin: china tianjin
- Brand Name: scaffolding coupler
- Model Number: BM201
- Minimum Order Quantity: 1000
- Price: 4.5
- Delivery Time: 15-25

## Product Specification

- MOQ: 1000
- Application: Construction
- Surface Treatment: Galvanized
- Package: Container
- Standard: EN74-1
- Feature: High Strength
- Material: Steel
- Color: Silver
- Highlight: **EN74-1 Steel Scaffolding Joint Coupler**, **Galvanized Scaffolding Joint Coupler**, **Construction Steel Coupler Scaffolding**

## Product Description

### Product Description:

Scaffolding Coupler

Scaffolding coupler, also known as scaffold clamp, is an essential tool for connecting scaffolding components in construction. It is designed to securely join scaffolding tubes together, providing stability and support for workers and materials at elevated heights.
Surface Treatment: Galvanized

Our scaffolding couplers are made of high-quality steel material and have a galvanized surface treatment. This process involves coating the couplers with a layer of zinc to protect them from corrosion and rust. This ensures the longevity and durability of the product, making it suitable for use in various weather conditions.
Material: Steel

We understand the importance of using strong and reliable materials in construction. Therefore, our scaffolding couplers are made of high-grade steel, ensuring their strength and durability. This makes them ideal for heavy-duty and long-term use.
Application: Construction

Scaffolding couplers are specifically designed for use in construction projects. They are widely used in building, renovation, maintenance, and repair work to provide a stable and safe platform for workers to perform their tasks at elevated heights.
Package: Container

To ensure the safe and convenient delivery of our scaffolding couplers, they are packaged in containers. This protects the couplers from damage during transportation and allows for easy handling on construction sites.
Feature: High Strength

One of the key features of our scaffolding couplers is their high strength. They are designed and manufactured to withstand heavy loads and provide a secure connection between scaffolding components. This makes them suitable for use in various construction projects, including high-rise buildings and bridges.
At Scaffolding Coupler, we also offer manual scaffold connection tools, including Japanese-style scaffold connectors, to assist with the assembly and disassembly of scaffolding. These tools are designed for ease of use and can save time and effort during construction.
Invest in our high-quality scaffolding couplers for a reliable and safe scaffolding system in your construction projects. Contact us today to learn more or to place an order.

### Features:

Product Name: Scaffolding Coupler
Color: Silver
MOQ: 1000
Standard: EN74-1
Feature: High Strength
Surface Treatment: Galvanized
Japanese Steel Pipe Connectors
Steel pipe coupler
Scaffolding coupler
Scaffold fittings

### Technical Parameters:

| Property | Value |
|---|---|
| Product Name | Scaffolding Coupler |
| Material | Steel |
| Surface Treatment | Galvanized |
| Standard | EN74-1 |
| Color | Silver |
| Application | Construction |
| Package | Container |
| Feature | High Strength |
| MOQ | 1000 |
| Other Names | Japanese Scaffold Connection Fixtures, Scaffold clamp, Steel pipe coupler |

### Applications:

Scaffolding Coupler - BM201

Scaffolding Coupler is a versatile and essential component in any scaffolding system. With its high load capacity and durable steel material, it provides a strong and reliable connection between scaffold tubes, ensuring safety and stability on construction sites.

The BM201 model is one of our best selling scaffolding couplers, trusted by builders and contractors for its quality and performance. With a galvanized surface treatment, it is resistant to corrosion and can withstand harsh weather conditions, making it suitable for both indoor

and outdoor use.
Brand Name: Scaffolding Coupler
Model Number: BM201
Place of Origin: China Tianjin
Minimum Order Quantity: 1000
Price: $4.5 per piece
Delivery Time: 15-25 days
Surface Treatment: Galvanized
Color: Silver
Name: Scaffolding Coupler
Material: Steel
MOQ: 1000
Contact Us for Orders

Scaffolding Coupler is commonly used in various construction projects, such as building new structures, repairing or renovating existing ones, and maintenance work. It plays a crucial role in providing a stable and safe working platform for workers at different heights.
One of the main advantages of our Scaffolding Coupler is its compatibility with various scaffold systems, including rotating clamp scaffold, plank coupler scaffold rotary clamp, and more. This allows for easy and efficient assembly and disassembly of scaffolding, saving time and labor costs.
Our Scaffolding Coupler is also lightweight and easy to transport, making it convenient for use in different locations. Its sturdy and durable design ensures a long lifespan, making it a cost-effective investment for any construction project.
At construction sites, safety is always a top priority. By using our Scaffolding Coupler, you can rest assured that your scaffolding system is secure and stable, providing a safe working environment for your workers. It is also certified and tested to meet safety standards, giving you peace of mind.
Whether you are a builder, contractor, or construction company, our Scaffolding Coupler is a must-have tool for your scaffolding system. It is suitable for both small and large-scale projects, making it a versatile and essential component in the construction industry.
Don't compromise on the safety and stability of your scaffolding system. Choose Scaffolding Coupler - BM201 for your next construction project. Contact us now to place your order and experience the difference it makes in your construction site.

### Customization:

Customization Service for Scaffolding Coupler - BM201
Brand Name: Scaffolding Coupler
Model Number: BM201
Place of Origin: China Tianjin
Minimum Order Quantity: 1000
Price: $4.5
Delivery Time: 15-25 days
Feature: High Strength
Material: Steel
Standard: EN74-1
Color: Silver
Surface Treatment: Galvanized
*Japanese Scaffold Clamps:* We offer customization service for our scaffolding coupler, BM201, which is also known as Japanese Scaffold Clamps. These clamps are made from high quality Japanese steel, ensuring superior load capacity and durability.
*Personalized Design:* Our team can work with you to design a scaffolding coupler that meets your specific requirements. We can modify the size, shape, and features to fit your unique needs.
*Rust-Resistant:* Our scaffolding coupler is treated with a galvanized surface, making it highly resistant to rust and corrosion. This ensures a longer lifespan and reliable performance even in harsh environments.
*High Strength:* Our scaffolding coupler is made from high strength steel, providing exceptional stability and load capacity. It can withstand heavy loads and rough use, making it suitable for various construction projects.
*Compliance with Standards:* Our scaffolding coupler is designed and manufactured in accordance with the EN74-1 standard, ensuring its quality and safety for use in construction projects.
*Quick Delivery:* In order to meet your project timeline, we offer a delivery time of 15-25 days for our customized scaffolding coupler.
*Minimum Order Quantity:* Our minimum order quantity for this product is 1000 pieces, allowing you to order the exact amount you need for your project.
Trust us to provide you with high quality, customizable scaffolding couplers that meet your specific requirements. Contact us today to discuss your customization needs and get a quote.

### Packing and Shipping:

Scaffolding Coupler Packaging and Shipping:

Our Scaffolding Couplers are carefully packaged and shipped to ensure safe delivery to our customers. Each coupler is individually wrapped and placed in a sturdy cardboard box to prevent any damage during transportation.
The packaging also includes a user manual and installation instructions for easy setup and use. We take great care in protecting our products and want to ensure that they arrive in perfect condition.
Once the order is placed, our dedicated team will pack and prepare your couplers for shipping. We offer various shipping options based on your location and delivery preferences. We work with trusted shipping partners to ensure timely and reliable delivery.
For international orders, we comply with all necessary shipping regulations and ensure proper documentation for hassle-free customs clearance.
At Scaffolding Coupler, we prioritize customer satisfaction and strive to make the packaging and shipping process as smooth and efficient as possible. We are committed to delivering high-quality products to our customers in a timely and secure manner.
Thank you for choosing Scaffolding Coupler. We look forward to serving you with our superior products and services.
