Scaffold Tube Construction Support tube scaffold pipe scaffolding galvanized pipes

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Bythai Scaffolding
- Certification: SGS
- Model Number: BT01
- Price: $5-$18
- Packaging Details: In bundles
- Delivery Time: 7-15 days
- Payment Terms: TT/LC
- Supply Ability: 1000tons per month

Product Specification

- Thickness: 3.2mm
- Name: Galvanised Scaffold Tube
- Yield Strength: 245N/mm2
- Diameter: 48.3mm
- Surface Treatment: Galvanised
- Standard: EN39
- Material: Galvanised Steel
- Application: Scaffolding

Product Description

Product Description:

Galvanised Scaffold Tube - The Ultimate Choice for Scaffolding

The Galvanised Scaffold Tube is a sturdy and reliable choice for any scaffolding project. Made from high-quality galvanised steel, this tube offers exceptional strength and durability, making it a preferred choice for construction workers, contractors, and DIY enthusiasts alike.

Product Overview

The Galvanised Scaffold Tube is designed to provide maximum support and stability for all types of scaffolding structures. With a tensile strength of 420N/mm2, this tube is capable of withstanding heavy loads and extreme weather conditions. Its galvanised coating also ensures protection against corrosion, making it suitable for use in both indoor and outdoor settings.

Key Features

Tensile Strength: The Galvanised Scaffold Tube has a tensile strength of 420N/mm2, making it incredibly strong and durable. This allows it to support heavy loads and withstand harsh weather conditions.

Galvanised Steel: Made from high-quality galvanised steel, this tube offers superior strength and corrosion resistance. The galvanised coating also adds an extra layer of protection, making it suitable for long-term use.

Lightweight: The Galvanised Scaffold Tube weighs only 6.4kg/m, making it easy to handle and transport. This makes it a preferred choice for construction workers and contractors who need to move the scaffolding frequently.

Versatile Application: This tube is primarily used for scaffolding projects, but it can also be used for a variety of other applications such as handrails, guardrails, and construction support.

Why Choose Galvanised Scaffold Tube?

The Galvanised Scaffold Tube is the ultimate choice for scaffolding due to its exceptional strength, durability, and versatility. Its galvanised steel construction ensures that it can withstand the heavy loads and harsh conditions of construction sites, making it a reliable and long-lasting choice for any project.

Furthermore, this tube is compatible with other scaffold components, making it easy to assemble and disassemble. Its lightweight nature also makes it easy to move and transport, saving valuable time and effort on the job site.

Get Your Galvanised Scaffold Tube Today

Don't settle for less when it comes to scaffolding. Choose the Galvanised Scaffold Tube for all your scaffolding needs and experience the ultimate in strength, durability, and performance. Order yours today and take your scaffolding projects to new heights!

Features:

Product Name: Galvanised Scaffold Tube
Material: Galvanised Steel
Weight: 6.4kg/m
Tensile Strength: 420N/mm2
Standard: EN39
Application: Scaffolding
scaffold tube
hot dip galvanized scaffolding steel tube
scaffold tube for sale
galvanised scaffold tube

Technical Parameters:

Product Name	Galvanised Scaffold Tube
Material	Galvanised Steel
Weight	6.4kg/m
Thickness	3.2mm
Application	Scaffolding
Surface Treatment	Galvanised
Standard	EN39
Yield Strength	245N/mm^2
Tensile Strength	420N/mm^2
Diameter	48.3mm
Technical Parameters for Galvanised Scaffold Tube	
Product Name	Galvanised Scaffold Tube

Material	Galvanised Steel
Weight	6.4kg/m
Thickness	3.2mm
Application	Scaffolding
Surface Treatment	Galvanised
Standard	EN39
Yield Strength	245N/mm^2
Tensile Strength	420N/mm^2
Diameter	48.3mm

Applications:

BS1139 scaffolding tube

Galvanized scaffold tube 48

Metal tubing

Surface Treatment: Galvanised

Tensile Strength: 420N/mm2

Product Application

The Galvanised Scaffold Tube by Bythai Scaffolding is a versatile and cost-effective product used in construction and building projects. It is commonly used for scaffolding, providing safety and support for workers at various heights. The galvanised surface treatment ensures durability and corrosion resistance, making it suitable for both indoor and outdoor use.

Product Features

Durability: Made from high-quality materials, the galvanised scaffold tube is strong and durable, able to withstand heavy loads and harsh weather conditions.

Flexibility: With its lightweight and flexible design, the scaffold tube can be easily adjusted and moved to different positions, making it ideal for various construction projects.

Easy Installation: The scaffold tube can be quickly and easily assembled, saving time and labor costs during construction.

High Strength: The scaffold tube has a high tensile strength of 420N/mm2, providing reliable support for workers and materials.

Cost-effective: The galvanised scaffold tube is a cost-effective solution for construction projects, offering durability and versatility at an affordable price.

Product Benefits

Ensures safety and support for workers at different heights

Highly durable and resistant to corrosion

Can be used for both indoor and outdoor construction projects

Easy to install and adjust, saving time and labor costs

Versatile and cost-effective solution for scaffolding needs

Conclusion

The Galvanised Scaffold Tube by Bythai Scaffolding is a reliable and cost-effective product that offers safety, support, and durability for various construction projects. Its high strength, corrosion resistance, and ease of installation make it a popular choice among builders and contractors. Trust Bythai Scaffolding for all your scaffolding needs.

Customization:

Bythai Scaffolding - Customized Service for Galvanised Scaffold Tube

Product Overview

Brand Name: Bythai Scaffolding
Model Number: BT01
Place of Origin: China
Certification: SGS
Price: $5-$18
Packaging Details: In bundles
Delivery Time: 7-15 days
Payment Terms: TT/LC
Supply Ability: 1000tons per month
Standard: EN39
Yield Strength: 245N/mm2
Tensile Strength: 420N/mm2
Weight: 6.4kg/m
Surface Treatment: Galvanised

Why Choose Bythai Scaffolding?

High-quality galvanised scaffold tubes for durability and longevity

Competitive scaffolding tube prices for cost-effectiveness

Reliable steel and pipe materials for strong and stable construction

Efficient and timely delivery of products within 7-15 days

Flexible payment terms of TT/LC for convenience

Large supply ability of 1000tons per month to meet any demand

Conforms to EN39 standard for quality assurance

High yield strength of 245N/mm2 and tensile strength of 420N/mm2 for safety and reliability

Lightweight design with a weight of 6.4kg/m for easy handling and transport

Galvanised surface treatment for corrosion resistance and long-lasting performance

Customized Solutions for Your Needs

At Bythai Scaffolding, we understand that each project is unique and may require specific scaffolding solutions. That's why we offer customized services for our galvanised scaffold tubes to meet your specific needs.
We can provide different lengths, thicknesses, and shapes of scaffold tubes according to your requirements. We also offer custom packaging options and can arrange for special delivery arrangements if needed.
Our team of experts will work closely with you to understand your project and provide the best-fit solutions for your construction needs.
With our customized service, you can be assured of the highest quality products and services to support your project's success.
Contact Us for Your Customized Galvanised Scaffold Tube Needs

If you're looking for reliable and cost-effective scaffolding solutions for your construction project, look no further than Bythai Scaffolding. Contact us today to discuss your customized needs and get a quote for our galvanised scaffold tubes.

Packing and Shipping:

Galvanised Scaffold Tube Packaging and Shipping

Our Galvanised Scaffold Tube is carefully packaged and shipped to ensure safe delivery to our customers.
Packaging

The Galvanised Scaffold Tube is first wrapped in protective material to prevent any scratches or damage during transportation. It is then placed in a sturdy cardboard box with additional padding for added protection.
For larger orders, the tubes are securely bundled together and placed on a pallet for easier handling and transportation.
Shipping

We offer both domestic and international shipping options for our Galvanised Scaffold Tube. For domestic orders, we use trusted courier services to ensure timely delivery. For international orders, we work with reputable freight companies to ensure safe and efficient transport.
Once your order has been shipped, we will provide you with a tracking number so you can monitor the progress of your delivery.
At Galvanised Scaffold Tube, we take great care in packaging and shipping our products to ensure they arrive at your doorstep in perfect condition.
