

3.2mm Galvanised Scaffold Tube hot dip galvanized scaffolding steel tube stamped

Our Product Introduction

for more products please visit us on bythaiscaffold.com

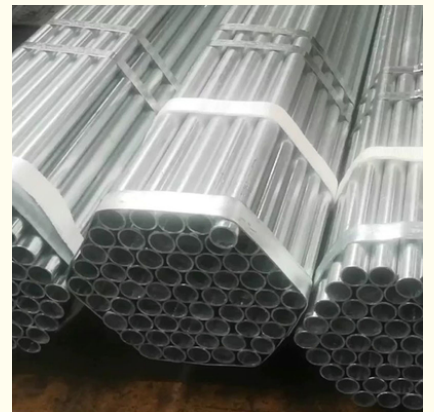

Basic Information

- Place of Origin: China
- Brand Name: Bythai Scaffolding
- Certification: SGS
- Model Number: BT01
- Price: \$5-\$18
- Packaging Details: In bundles
- Delivery Time: 7-15 days
- Payment Terms: TT/LC
- Supply Ability: 1000tons per month

Product Specification

- Yield Strength: 245N/mm2
- Weight: 6.4kg/m
- Diameter: 48.3mm
- Application: Scaffolding
- Surface Treatment: Galvanised
- Material: Galvanised Steel
- Tensile Strength: 420N/mm2
- Thickness: 3.2mm

Product Description

Product Description:

Galvanised Scaffold Tube

The Galvanised Scaffold Tube is a highly durable and versatile product, designed specifically for the construction industry. It is a type of scaffolding tube that is galvanized to provide added strength and resistance to corrosion.

The Galvanised Scaffold Tube is made of high-quality steel with a yield strength of 245N/mm² and a thickness of 3.2mm. This makes it a strong and reliable choice for any scaffolding project, providing a safe and stable platform for workers to perform their tasks.

One of the main advantages of the Galvanised Scaffold Tube is its superior surface treatment. The galvanization process involves coating the tube with a layer of zinc, which provides a protective barrier against rust and other forms of corrosion. This makes the tube suitable for use in all weather conditions and ensures a longer lifespan for the product.

The Galvanised Scaffold Tube has a diameter of 48.3mm, making it compatible with a wide range of scaffolding equipment. It can be easily connected to other scaffolding tubes and fittings, allowing for quick and efficient assembly on the construction site.

This product is specifically designed for use in scaffolding applications. It is commonly used as a structural element in tube scaffolding, providing a sturdy support system for workers and materials. The Galvanised Scaffold Tube is also a popular choice for pipe scaffold tube, as it can withstand heavy loads and is easy to handle and transport.

The Galvanised Scaffold Tube is an essential scaffold material for any construction project. It is lightweight, easy to handle, and can be cut to the desired length, making it a versatile choice for a variety of scaffolding needs. It is also commonly used as scaffold poles, providing vertical support for the scaffolding structure.

In summary, the Galvanised Scaffold Tube is a top-quality product that offers strength, durability, and corrosion resistance. It is a crucial component of scaffolding equipment, providing a safe and reliable platform for workers to carry out their tasks. With its superior surface treatment and compatibility with various scaffolding fittings, this product is a must-have for any construction project.

Features:

Product Name: Galvanised Scaffold Tube

Weight: 6.4kg/m

Diameter: 48.3mm

Yield Strength: 245N/mm²

Thickness: 3.2mm

Tube Scaffolding

BS1139 Scaffolding Tube

Steel and Pipe

Galvanized

Durable

Lightweight

Our Galvanised Scaffold Tubes are made from galvanised steel, making them sturdy, durable, and able to withstand high load capacities. With a weight of 6.4kg/m, they are easy to handle and install, making them a popular choice in the construction industry.

Surface Treatment

Our scaffolding tubes are galvanised to ensure maximum corrosion and weather resistance, making them suitable for use in any environment. This also adds to their durability, ensuring that they have a long-lasting lifespan.

Versatile and Customizable

Our Galvanised Scaffold Tubes are available in standard sizes, making them suitable for a wide range of scaffolding systems. However, we also offer customizable options to meet your specific requirements. This versatility makes them a popular choice for various scaffolding equipment needs.

Quality Assurance

All of our products are certified and undergo strict quality control procedures to ensure that they meet industry standards. This gives our customers peace of mind, knowing that they are using reliable and high-quality products.

Competitive Price and Quick Delivery

At Bythai Scaffolding, we believe in providing our customers with the best value for their money. That's why we offer competitive prices without compromising on quality. Our efficient manufacturing process also allows us to offer quick delivery times, ensuring that you have your scaffolding tubes when you need them.

Convenient Packaging

Our Galvanised Scaffold Tubes are bundled together for easy transportation and storage. This makes them convenient to handle and transport, saving you time and effort on your construction site.

Widely Used and Trusted Brand

Our Galvanised Scaffold Tubes are widely used in the construction industry for building support structures such as bridges, buildings, and temporary platforms. With our commitment to quality and customer satisfaction, Bythai Scaffolding has become a trusted brand in the industry.

Choose Bythai Scaffolding's Galvanised Scaffold Tubes for your next construction project and experience the benefits of a safe, reliable, and cost-effective solution. Contact us today to place your order!

Customization:

Customization Service for Galvanised Scaffold Tube - Bythai Scaffolding

Brand Name: Bythai Scaffolding

Model Number: BT01

Place of Origin: China

Certification: SGS

Price: \$5-\$18

Packaging Details: In bundles

Delivery Time: 7-15 days

Payment Terms: TT/LC

Supply Ability: 1000tons per month

Standard: EN39

Diameter: 48.3mm

Weight: 6.4kg/m

Yield Strength: 245N/mm2

Name: Galvanised Scaffold Tube

At Bythai Scaffolding, we offer customized services for our Galvanised Scaffold Tube to meet the specific needs of our customers. Our Galvanised Scaffold Tube, also known as galvanized pipe or tube scaffolding, is made of high-quality steel and has a diameter of 48.3mm with a weight of 6.4kg/m. It has a yield strength of 245N/mm2, ensuring its durability and safety for use in construction and other industries.

Our Galvanised Scaffold Tube is certified by SGS and meets the EN39 standard, making it suitable for use in various countries and regions. We offer a wide range of customization options, including different lengths and thicknesses, to meet the specific requirements of our customers.

With our advanced production technology and high-quality materials, we can provide Galvanised Scaffold Tube that meets the highest quality standards. Our packaging details include bundling the tubes for easy transportation and storage. We also offer flexible delivery times of 7-15 days and payment terms of TT/LC for the convenience of our customers.

With a monthly supply ability of 1000 tons, we can ensure a steady and timely supply of our Galvanised Scaffold Tube. Contact us today to discuss your customization needs for our top-quality Galvanised Scaffold Tube. Let Bythai Scaffolding be your trusted partner for all your scaffolding needs.

Packing and Shipping:

Galvanised Scaffold Tube Packaging and Shipping

Each Galvanised Scaffold Tube is carefully packaged to ensure safe delivery to our customers. The packaging is designed to protect the product from any damage during transportation.

Packaging:

The tubes are first wrapped in protective plastic or bubble wrap to prevent scratches and dents.

They are then placed in sturdy cardboard boxes or crates, depending on the quantity ordered.

The boxes or crates are sealed and labeled with the product name and specifications.

Shipping:

We offer both domestic and international shipping options for our Galvanised Scaffold Tubes.

For domestic shipping, we use reliable and trusted carriers to ensure timely delivery.

For international shipping, we work with our logistics partners to ensure smooth customs clearance and prompt delivery.

Customers can also arrange for their own shipping if preferred.

Shipping costs will be calculated based on the destination and weight of the order.

At Galvanised Scaffold Tube, we take great care in packaging and shipping our products to ensure they arrive in perfect condition. We strive to provide the best customer experience and satisfaction with every order.
