

48.3mm Diameter Galvanized Scaffold Tube 48 for Scaffolding Construction

Basic Information

- Place of Origin: China
- Brand Name: Bythai Scaffolding
- Certification: SGS
- Model Number: BT01
- Price: \$5-\$18
- Packaging Details: In bundles
- Delivery Time: 7-15 days
- Payment Terms: TT/LC
- Supply Ability: 1000tons per month

Product Specification

- Yield Strength: 245N/mm2
- Tensile Strength: 420N/mm2
- Material: Galvanised Steel
- Diameter: 48.3mm
- Surface Treatment: Galvanised
- Standard: EN39
- Weight: 6.4kg/m
- Application: Scaffolding

Product Description

Product Description:

Galvanised Scaffold Tube

The Galvanised Scaffold Tube is a key component in the construction industry, specifically in tube and coupler scaffolding systems. Made from galvanised steel, this durable and corrosion-resistant tube is designed to provide a safe and stable platform for workers to perform their tasks at various heights.

Product Overview

The Galvanised Scaffold Tube is a tubular structure with a diameter of 48.3mm and a weight of 6.4kg/m. It is manufactured in compliance with the EN39 standard, ensuring high quality and safety standards. The surface treatment of galvanising provides a protective layer against rust and other environmental factors, making it suitable for both indoor and outdoor use.

Key Features

Galvanised Surface Treatment: The galvanised surface treatment gives the scaffold tube a long-lasting protection against corrosion and adds to its overall durability.

Galvanised Steel Material: Made from high-quality galvanised steel, the scaffold tube is strong, sturdy and able to withstand heavy loads.

EN39 Standard: The scaffold tube meets the strict requirements of the EN39 standard, ensuring it is safe and reliable for use in construction projects.

48.3mm Diameter: The 48.3mm diameter of the scaffold tube provides a stable and secure platform for workers to perform their tasks at various heights.

6.4kg/m Weight: The scaffold tube's weight of 6.4kg/m makes it lightweight and easy to handle, while also providing strength and stability.

Benefits

Provides a safe and stable platform for workers to perform tasks at various heights

Durable and corrosion-resistant, suitable for both indoor and outdoor use

Meets high quality and safety standards set by the EN39 standard

Easy to handle and assemble, reducing labor time and costs

Compatible with other tube and coupler scaffolding systems

Price

The price of galvanised scaffold tubes varies depending on the quantity and supplier. However, with its numerous benefits and long-term durability, investing in galvanised scaffold tubes is a wise choice for any construction project.

Looking for the best galvanised scaffold tubes price? Contact us now for a competitive quote and high-quality products!

Technical Parameters:

Technical Parameter	Value
Name	Galvanised Scaffold Tube
Diameter	48.3mm
Thickness	3.2mm
Weight	6.4kg/m
Material	Galvanised Steel
Yield Strength	245N/mm2
Tensile Strength	420N/mm2
Standard	EN39
Surface Treatment	Galvanised
Application	Scaffolding

Applications:

Galvanised Scaffold Tube: The Perfect Solution for All Your Scaffolding Needs

Are you in search of a high-quality and reliable scaffolding solution? Look no further than the Galvanised Scaffold Tube by Bythai Scaffolding. This scaffolding tube is a must-have for any construction project, providing a durable and versatile solution for all your scaffolding needs.

Brand Name: Bythai Scaffolding

With a reputation for excellence and reliability in the construction industry, Bythai Scaffolding is proud to present our top-of-the-line Galvanised Scaffold Tube. Our brand is known for its commitment to providing high-quality and durable products at competitive prices. Model Number: BT01

This Galvanised Scaffold Tube is designated as BT01, indicating its superior quality and performance. With this model, you can be

assured of a safe and reliable scaffolding system for your construction projects.

Place of Origin: China

Proudly manufactured in China, the Galvanised Scaffold Tube is made with the highest quality standards and adheres to strict safety regulations. Its production is overseen by our team of experts to ensure that every unit meets our customers' satisfaction.

Certification: SGS

Our Galvanised Scaffold Tube has been certified by SGS, one of the world's leading inspection, verification, testing, and certification companies. This certification is a testament to the product's quality, safety, and durability.

Price: \$5-\$18

At Bythai Scaffolding, we believe in providing our customers with the best value for their money. Our Galvanised Scaffold Tube is competitively priced, ranging from \$5 to \$18, making it a cost-effective choice for all your scaffolding needs.

Packaging Details: In bundles

Our Galvanised Scaffold Tube is packaged in bundles, ensuring easy handling and transportation. This packaging method also protects the tubes from damage during transit, ensuring that they arrive at your construction site in perfect condition.

Delivery Time: 7-15 days

With our efficient production and supply chain processes, we can guarantee a delivery time of 7-15 days for your Galvanised Scaffold Tube order. This quick turnaround time allows you to start your construction project without any delays.

Payment Terms: TT/LC

We offer flexible payment terms for our customers, accepting both TT (Telegraphic Transfer) and LC (Letter of Credit). This allows you to choose the payment method that suits your convenience.

Supply Ability: 1000tons per month

With a monthly supply capacity of 1000 tons, we can easily meet the demands of our customers, no matter the size of their construction project. This high supply capability also ensures that we can fulfill bulk orders without any delays.

Standard: EN39

The Galvanised Scaffold Tube by Bythai Scaffolding meets the EN39 standard, ensuring its compliance with international safety and quality regulations. This makes it a reliable and safe choice for your scaffolding needs.

Material: Galvanised Steel

Made from high-quality galvanised steel, our scaffolding tube is durable and long-lasting. The galvanisation process provides an extra layer of protection, making it resistant to corrosion and ensuring its longevity.

Thickness: 3.2mm

The Galvanised Scaffold Tube has a thickness of 3.2mm, providing it with the necessary strength and stability to support heavy loads. This thickness also makes it durable and able to withstand harsh weather conditions.

Yield Strength: 245N/mm2

With a yield strength of 245N/mm2, our Galvanised Scaffold Tube is strong enough to support the weight of workers, construction materials, and equipment. This high yield strength also makes it a safe and reliable option for any construction project.

Application and Usage

The Galvanised Scaffold Tube is suitable for a wide range of construction projects, including building, renovation, and maintenance works. It is commonly used in conjunction with tube and coupler scaffolding systems to provide a safe and stable working platform for workers at various heights.

Our scaffolding tube is also a popular choice for use in the construction of bridges, tunnels, and other large structures. Its versatility and durability make it an essential building material for any construction project.

Easy to Assemble and Use

The Galvanised Scaffold Tube is designed to be easy to assemble and use, making it a popular choice among construction professionals. Its simple and straightforward installation process saves time and effort, ensuring that your construction project progresses smoothly.

Safe and Reliable

Safety is a top priority for us at Bythai Scaffolding, and our Galvanised Scaffold Tube is no exception. It is designed and manufactured to meet the highest safety standards, ensuring the safety of workers and the stability of the scaffolding structure.

Versatile and Cost-Effective

The Galvanised Scaffold Tube is a versatile and cost-effective solution for all your scaffolding needs. Its compatibility with various scaffolding systems and its durability make it a cost-effective choice in the long run.

Scaffold Accessories

In addition to our high-quality Galvanised Scaffold Tube, we also offer a wide range of scaffold accessories to complement your scaffolding system. These include couplers, base plates, and other components to ensure the stability and safety of your scaffolding structure.

Invest in the Galvanised Scaffold Tube by Bythai Scaffolding for your next construction project and experience the difference in quality, durability, and safety. Contact us today to place your order or to learn more about our products and services.

Customization:

Customized Service for Galvanised Scaffold Tube

Brand Name: Bythai Scaffolding

Model Number: BT01

Place of Origin: China

Certification: SGS

Price: \$5-\$18

Packaging Details: In bundles

Delivery Time: 7-15 days

Payment Terms: TT/LC

Supply Ability: 1000tons per month

Material: Galvanised Steel

Surface Treatment: Galvanised

Standard: EN39

Tensile Strength: 420N/mm2

Application: Scaffolding

Our customized service for Galvanised Scaffold Tube offers high-quality and durable products to meet your specific needs. Our brand, Bythai Scaffolding, is a trusted name in the industry, known for its superior quality and reliability. The model number for our Galvanised Scaffold Tube is BT01, and it is manufactured in China, ensuring cost-effectiveness without compromising on quality. Our product is certified by SGS, guaranteeing its safety and compliance with international standards. Our prices for Galvanised Scaffold Tube range from \$5 to \$18, providing you with various options to suit your budget. The packaging details for our product include bundling, ensuring safe and secure transportation of the tubes. We understand the importance of timely delivery, and hence, we ensure that our products are delivered within 7-15 days. Our payment terms include TT/LC, providing you with flexibility in payment options. With a supply ability of 1000tons per month, we can fulfill large orders and meet your demands efficiently. Our Galvanised Scaffold Tube is made of high-quality galvanised steel, providing durability and strength for your scaffolding needs. The surface treatment for our tubes is galvanised, which offers protection against corrosion, extending the lifespan of the tubes. Our product conforms to the standard EN39, ensuring its quality and reliability. The tensile strength of our Galvanised Scaffold Tube is 420N/mm², making it suitable for heavy-duty applications. Our product is primarily used for scaffolding, providing safety and support for construction projects. Our customized service for Galvanised Scaffold Tube also includes options for BS1139 scaffolding tubes, seamless pipes, galvanised scaffolding pipe tubes, and scaffold steel pipes. We strive to meet all your requirements and provide you with the best possible solution for your scaffolding needs.

Packing and Shipping:

Packaging and Shipping of Galvanised Scaffold Tube

The Galvanised Scaffold Tube is carefully packaged and shipped to ensure safe delivery to our customers.

Packaging Process

Each tube is first wrapped in a protective layer of plastic to prevent scratches and damage during transportation.

The tubes are then placed in bundles of 30 pieces, with wooden supports between each layer to prevent any movement or shifting during transit.

The bundles are then securely banded together and labeled with the product name, size, and quantity.

Shipping Methods

We offer both sea and air shipping options for our Galvanised Scaffold Tubes.

For sea shipping, the tubes are loaded into shipping containers and sealed to protect them from the elements during the journey.

For air shipping, the tubes are packed into sturdy wooden crates to ensure their safe arrival.

We work closely with our shipping partners to ensure timely delivery and proper handling of our products.

Delivery

Our Galvanised Scaffold Tubes are delivered to our customers via truck or cargo ship, depending on the shipping method chosen.

We provide tracking information for all shipments so that customers can monitor the progress of their order.

Upon arrival, the tubes are unloaded and carefully inspected to ensure they have arrived in perfect condition.

We take great care in packaging and shipping our products to ensure our customers receive the best quality tubes.
