- Payment Terms: container, shipping

Product Specification

- Length: Customized
- Packaging: Container
- Usage: Scaffolding
- Material: Steel
- Surface: Pre-galvanized/hot Dip Galvanized/Spray Plastic
- Place Of Shipment: China

Product Description

Product Description:

Scaffolding Plank

This is a product overview of Scaffolding Plank, a key component in scaffolding systems used for construction and maintenance projects. Made of high-quality steel, our scaffolding planks provide a strong and stable platform for workers to carry out their tasks safely and efficiently. With various surface treatment options, customizable length, and reliable quality, our scaffolding plank is the perfect choice for your scaffolding needs.

Material: Steel

Our Scaffolding Planks are made of high-grade steel, ensuring durability and strength. The use of steel also makes the planks resistant to corrosion and weathering, making them suitable for both indoor and outdoor use.

Surface Treatment Options

We offer three different surface treatment options for our scaffolding planks: pre-galvanized, hot dip galvanized, and spray plastic. The pre-galvanized planks have a layer of zinc coating for added protection against corrosion. The hot dip galvanized planks have a thicker layer of zinc coating, making them more durable and suitable for harsh environments. The spray plastic surface provides an extra layer of protection and can also be customized with different colors for easy identification.

Customizable Length

We understand that every construction project is unique, and scaffolding planks need to be tailored to fit specific requirements. That's why we offer customizable lengths for our scaffolding planks, ensuring that you have the perfect size for your project. From 1 meter to 6 meters, we can provide the length that best suits your needs.

Usage: Scaffolding

Our scaffolding planks are specifically designed for use in scaffolding systems. They are suitable for various scaffolding applications, including construction, renovation, maintenance, and repair work. The sturdy and stable platform provided by our planks ensures the safety and efficiency of workers on the job.

Place of Shipment: China

Our Scaffolding Planks are proudly manufactured in China, where we have a state-of-the-art production facility with advanced equipment and skilled workers. We adhere to strict quality control standards to ensure the highest quality of our products. Our location in China also allows us to offer competitive prices without compromising on quality.

Conclusion

In summary, our Scaffolding Planks are made of high-quality steel, with options for different surface treatments and customizable lengths. They are specifically designed for use in scaffolding systems and are suitable for various applications. With our commitment to quality and competitive prices, our scaffolding planks are the ideal choice for your scaffolding needs.

We accept container shipments and various payment terms for your convenience.

Trust Bythai for all your scaffolding needs. Contact us today to place your order for our high-quality BM205 scaffolding plank.

Packing and Shipping:

Packaging and Shipping of Scaffolding Plank

When it comes to packaging and shipping our scaffolding plank, we take great care in ensuring that it arrives at its destination in perfect condition. Our packaging process is designed to protect the plank from any potential damage during transit, while also making it easy to handle and transport.

Packaging

Our scaffolding plank is packaged in sturdy wooden crates to provide maximum protection during shipping. Each plank is carefully wrapped in plastic and then securely placed inside the crate, with ample padding and cushioning materials to prevent any movement or shifting. This packaging method ensures that the plank is not only protected from physical damage, but also from any moisture or weather conditions.

In addition to the wooden crates, we also offer the option of packaging our scaffolding plank in bundles, with each bundle containing a specific number of planks. This method is ideal for smaller orders and makes it easier to handle and transport the planks.

Shipping

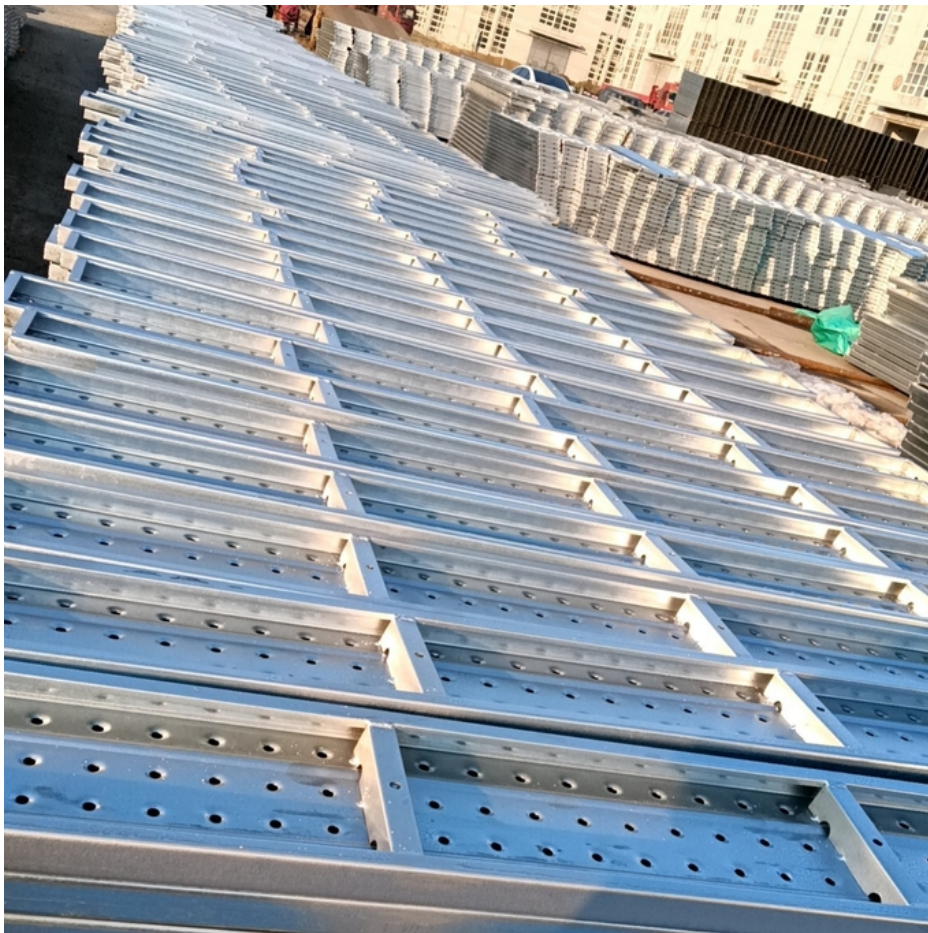

We work with reliable and trusted shipping companies to ensure that our scaffolding plank is delivered to our customers in a timely and efficient manner. We offer both domestic and international shipping options and will work with you to find the best shipping method for your specific needs.

For larger orders, we can arrange for the planks to be shipped via truck or container, depending on the quantity and destination. For smaller orders, we use courier services to ensure quick and safe delivery.

Our team carefully tracks each shipment to ensure that it reaches its destination on time. We also provide our customers with tracking information so they can monitor the progress of their order.

With our careful packaging and reliable shipping methods, you can rest assured that your scaffolding plank will arrive at its destination in perfect condition and ready to use.
