Product Description

Product Description:

Scaffolding Plank - A Durable and Reliable Solution for Your Scaffolding Needs

Overview

Scaffolding Plank, also known as steel plank for scaffold, is a versatile and essential component for any scaffolding structure. It provides a stable and safe platform for workers to stand on while working at height. Made from high-quality steel and available in various surface treatments, our Scaffolding Plank is the perfect choice for scaffolding construction.

Packaging

Our Scaffolding Plank is packaged in containers to ensure safe and efficient transportation. This packaging method not only protects the planks during shipment but also makes it easier to unload and store them on the job site.

Surface Treatments

Our Scaffolding Plank is available in three surface treatments: pre-galvanized, hot dip galvanized, and spray plastic. Each treatment offers different levels of protection against corrosion and rust, making our planks suitable for various environments and weather conditions.

Pre-galvanized: This treatment involves coating the steel plank with a layer of zinc before the manufacturing process. It provides basic protection against rust and is suitable for use in dry and indoor environments.

Hot Dip Galvanized: In this process, the steel plank is dipped in a bath of molten zinc, creating a thicker and more durable layer of protection. This treatment is ideal for outdoor use and can withstand harsh weather conditions.

Spray Plastic: Our scaffolding plank can also be coated with a layer of plastic through a spraying process. This treatment not only provides excellent corrosion resistance but also adds a non-slip surface for improved safety.

Material

Our Scaffolding Plank is made from high-quality steel, ensuring strength, durability, and load-bearing capacity. The steel used is compliant with BS1139 standards, ensuring the safety and reliability of our product.

Place of Shipment

All our Scaffolding Planks are manufactured and shipped from China. Our factory is equipped with advanced technology and skilled workers, ensuring the highest quality of products for our customers.

Usage

Scaffolding Plank is an essential component for any scaffolding structure. It provides a safe and stable platform for workers to perform tasks at height, such as construction, maintenance, and repair work. Our durable and reliable Scaffolding Plank is suitable for various industries, including construction, shipbuilding, and industrial maintenance.

Conclusion

In summary, our Scaffolding Plank is a top-quality and versatile product that meets the highest standards of safety and reliability. With various surface treatments and made from high-quality steel, our BS1139 steel plank is the perfect choice for all your scaffolding needs. Trust us to provide you with a durable and long-lasting solution for your scaffolding construction.

Technical Parameters:

Technical Parameter	Description
Product Name	Scaffolding Plank
Length	Customized

Material	Steel
Surface	Pre-galvanized/hot Dip Galvanized/Spray Plastic
Place of Shipment	China
Packaging	Container
Usage	Scaffolding
Key Features:	
Steel Thickness	2.3mm
Steel Type	Galvanized
Design	Steel plank with hook

Applications:

Welcome to Bythai Scaffolding Plank

Brand Name: Bythai

Model Number: BM205

Place of Origin: China

Our Scaffolding Plank is a high-quality product that is perfect for your construction needs. It is designed and manufactured by Bythai, a leading brand in the construction industry.
Product Description

Our Scaffolding Plank, model number BM205, is a sturdy and durable steel plank that is used for scaffolding. It is made from high-quality steel material and is available in various sizes and lengths to suit your specific requirements. It is a must-have for any construction project, providing a safe and reliable platform for workers to perform their tasks.
Minimum Order Quantity: 1000

We have a minimum order quantity of 1000 pieces, ensuring that you have enough planks to complete your project. We also offer bulk discounts for larger orders.
Price: 4.5-8.5 per piece

Our Scaffolding Plank is competitively priced at 4.5-8.5 per piece, making it an affordable choice for your construction needs.
Packaging Details: Bundles

Our planks are packaged in bundles for easy transportation and storage. This ensures that your planks arrive at your construction site in perfect condition.
Delivery Time: 10-15 days

We understand the importance of timely delivery in the construction industry. That's why we guarantee a delivery time of 10-15 days, ensuring that your project stays on schedule.
Payment Terms: Container, Shipping

We accept payment through containers or shipping, making it convenient for our customers to complete their transactions.
Length: Customized

Our Scaffolding Plank is available in various lengths, and we can also customize the length to meet your specific needs. This makes it suitable for different types of construction projects.
Place of Shipment: China

All our products are shipped from China, ensuring high-quality standards and timely delivery to our customers worldwide.
Surface: Pre-galvanized/Hot Dip Galvanized/Spray Plastic

Our Scaffolding Plank comes with different surface finishes, including pre-galvanized, hot dip galvanized, and spray plastic. This provides additional protection against rust and corrosion, extending the lifespan of the planks.
Material: Steel

Our Scaffolding Plank is made from high-quality steel material, ensuring strength and durability. It can withstand heavy loads and harsh weather conditions, making it ideal for outdoor construction projects.
Usage: Scaffolding

Our Scaffolding Plank is specifically designed for scaffolding, making it a necessary component for any construction project. It provides a safe and stable platform for workers to perform their tasks at different heights.
Key Features

Sturdy and durable steel frame for decking plank

Perfect for scaffolding and construction projects

Available in various lengths and sizes

Customizable length to meet specific needs

Comes with different surface finishes for added protection

Made from high-quality steel material

Can withstand heavy loads and harsh weather conditions

Provides a safe and stable platform for workers

Customization:

Scaffolding Plank Customization Service - Bythai BM205

Brand Name: Bythai
Model Number: BM205
Place of Origin: China
Minimum Order Quantity: 1000

Price: 4.5-8.5
Packaging Details: In bundles
Delivery Time: 10-15 days
Payment Terms: Container, shipping
Place of Shipment: China
Length: Customized
Packaging: Container
Usage: Scaffolding
Surface: Pre-galvanized/hot dip galvanized/spray plastic
With our Scaffolding Plank Customization Service, you can get the perfect galvanized steel planks for your specific needs. Our brand, Bythai, offers the high-quality BM205 model that is made in China. Our minimum order quantity is 1000 pieces, and the price ranges from 4.5-8.5 depending on your customization requirements.
The packaging of our steel planks is done in bundles, and the delivery time is between 10-15 days. We offer various payment methods, including container and shipping. Our place of shipment is in China, but we can deliver to any location worldwide.
The length of our scaffolding planks can be customized according to your project's requirements. We package them in containers for easy transportation and storage. Our steel planks are specially designed for scaffolding purposes and can withstand heavy loads.
We provide different surface options for our steel planks, including pre-galvanized, hot dip galvanized, and spray plastic. This ensures their durability and longevity, even in harsh weather conditions.
Choose Bythai for your scaffolding steel plank needs and get a customized solution that meets your exact specifications. Our BM205 model is also compatible with ringlock scaffolding systems, making it a versatile and reliable choice for your construction projects. Contact us now to discuss your customization requirements and get a quote for our high-quality steel planks.

Packing and Shipping:

Packaging and Shipping of Scaffolding Plank

Packaging:

Each scaffolding plank is packed in a durable cardboard box to ensure safe transportation and delivery. The box is designed to protect the plank from any damage that may occur during shipping.
The dimensions of the box are carefully chosen to fit the size of the scaffolding plank, minimizing excess space and reducing the risk of damage during transit.
The box is also labeled with the product name, dimensions, and weight for easy identification and handling.

Shipping:

Our scaffolding planks are shipped worldwide using reliable and efficient shipping methods.
For domestic shipments, we utilize ground transportation services to ensure timely and cost-effective delivery.
For international shipments, we work with reputable freight companies to ensure smooth customs clearance and prompt delivery to the final destination.
All shipments are carefully tracked and monitored to ensure timely and secure delivery.
