- Highlight: **H 30cm Step Scaffolding Ladders, 150kg Load Capacity Scaffolding Ladders, HDG Ladder Scaffold Plank**

### Product Description:

#### Scaffolding Ladders

Scaffolding Ladders are essential tools for any construction or renovation project, providing a safe and stable means of reaching high areas. Our Scaffolding Ladders are designed to meet the needs of professionals and DIY enthusiasts alike, with a focus on safety, durability, and convenience.

#### Size and Step Width

Our Scaffolding Ladders come in a standard size of 3m, perfect for reaching most heights. Each ladder has a step width of 50cm, providing enough space for comfortable and secure footing while climbing.

#### Color and Material

The ladders are available in a sleek silver color, giving them a professional and modern look. They are made of high-quality aluminum or hot-dip galvanized (HDG) steel, ensuring sturdiness and longevity.

#### Load-bearing Capacity and Step Height

The Load-bearing capacity of our Scaffolding Ladders is impressive, with the ability to hold up to 150kg. Each step has a height of 30cm, making it easy to climb up and down the ladder.

#### Ladder with Hook

Our Scaffolding Ladders come equipped with a hook at the top, allowing them to be easily attached to a scaffolding system. This feature provides additional stability and safety while working at higher levels.

#### Scaffolding Props

For added safety and stability, our Scaffolding Ladders come with scaffolding props. These props can be adjusted to provide support and balance on uneven or sloping surfaces.

#### Non-slip Design

The steps of our Scaffolding Ladders are designed to be non-slip, reducing the risk of accidents and ensuring a secure grip for the user. This feature is especially important when working in wet or muddy conditions.

#### Lightweight and Sturdy

Despite their sturdy and durable construction, our Scaffolding Ladders are surprisingly lightweight, making them easy to transport and maneuver on the job site. This feature is especially beneficial for those working on multiple locations.

#### Easy to Assemble

Our Scaffolding Ladders are designed for ease of use, with a simple and straightforward assembly process. This feature saves time and effort, allowing you to focus on the task at hand.

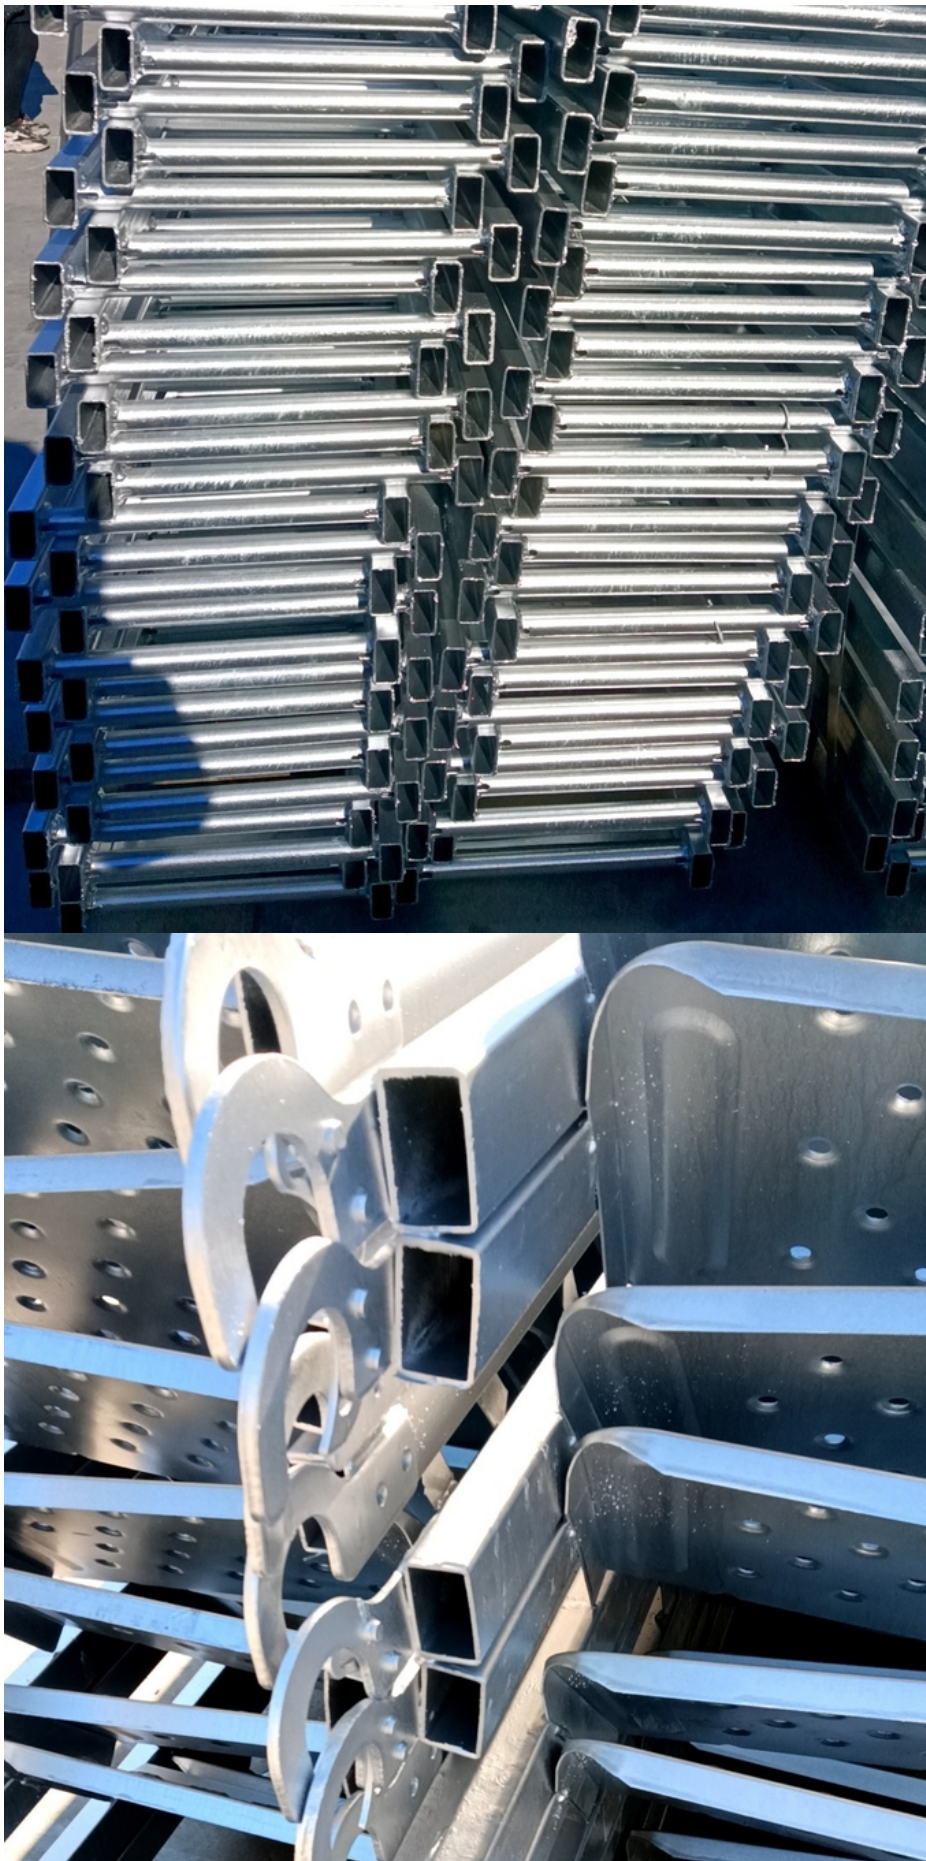

#### Multifunctional

Our Scaffolding Ladders are not limited to just one use, making them a versatile and cost-effective option. They can be used for various purposes, such as painting, cleaning, or maintenance work.

#### Safe and Stable

Above all, safety is our top priority. Our Scaffolding Ladders are built to meet strict safety standards and undergo rigorous testing to ensure their stability and reliability. You can trust our ladders to keep you safe while working at heights.

In conclusion, our Scaffolding Ladders are the perfect solution for all your high-reaching needs. With their size, step width, color, material, load-bearing capacity, and step height, along with features like a ladder with hook, scaffolding props, non-slip design, lightweight, sturdy and durable construction, easy assembly, versatility, and safety, our Scaffolding Ladders are the ideal choice for any construction or renovation project. Get yours today and experience the convenience and peace of mind our ladders provide.

## Applications:

Scaffolding Ladders – bythai BM224

Brand Name: bythai

Model Number: BM224

Place of Origin: China Tianjin

Minimum Order Quantity: 1000

Packaging Details: Container

Delivery Time: 10-25 days

Material: Aluminum/HDG

Color: Silver

Warranty: 2 Years

Size: 3m

Surface Treatment: HDG

Product Description

The Scaffolding Ladders bythai BM224 are essential for any construction site. Made with high-quality aluminum, these ladders are lightweight yet durable, making them perfect for climbing up and down scaffolding structures.

The BM224 model features a galvanized steel ladder, providing extra sturdiness and ensuring safety for workers. Its silver color also makes it easily visible on the construction site, reducing the risk of accidents.

Application and Usage

The bythai BM224 Scaffolding Ladders are designed for use in construction sites, providing easy access to different levels of scaffolding structures. They are suitable for both indoor and outdoor use and can withstand heavy loads, making them ideal for various construction projects.

Features and Benefits

One of the key features of the bythai BM224 Scaffolding Ladders is its lightweight aluminum material, making them easy to move and transport around the construction site. The galvanized steel ladder also adds extra strength and durability, ensuring the safety of workers. These ladders are designed with safety in mind, with a non-slip surface and sturdy construction. The 2-year warranty also provides peace of mind for customers, knowing they are purchasing a high-quality and reliable product.

Size and Packaging

The bythai BM224 Scaffolding Ladders come in a standard size of 3m, suitable for most construction needs. They are packaged in containers for easy transportation and storage.

Delivery Time

With a delivery time of 10-25 days, customers can expect to receive their Scaffolding Ladders in a timely manner, allowing them to continue their construction projects without delay.

Conclusion

The bythai BM224 Scaffolding Ladders are a must-have for any construction site. With their high-quality materials, safety features, and convenient size, they are the perfect solution for climbing up and down scaffolding structures. Plus, with a 2-year warranty and timely delivery, customers can trust in the reliability and efficiency of this product.
