Basic Information

- Place of Origin: China
- Brand Name: Bythai
- Certification: SGS
- Model Number: BM205
- Minimum Order Quantity: 100
- Price: 4.5-8.5
- Packaging Details: In bundles
- Delivery Time: 10-15
- Payment Terms: TT/TC

Product Specification

- Color: Steel/Spray Plastic
- Shipping Origin: China
- Load Capacity: High
- Size: Customized
- Arrival Time: 10-15
- Material: Q235
- Highlight: **Q235 Material Frame Scaffold,
Q235 Steel Ladder Frame,
Outdoor Frame System Scaffolding**

Product Description

Product Description:

Frame System Scaffolding - Product Overview

The Frame System Scaffolding is a versatile and customizable solution for all your construction and maintenance needs. It is designed to provide a safe and stable working platform for workers at various heights, making it an essential product for any construction site.

Size: Customized

The Frame System Scaffolding is available in custom sizes to meet the specific requirements of your project. Whether you need a small platform for a simple task or a larger structure for a complex project, our scaffolds can be tailored to fit your needs.

Arrival time: 10-15 days

With a fast delivery time of 10-15 days, the Frame System Scaffolding ensures that your project stays on schedule. We understand the importance of timely delivery in the construction industry and strive to provide our customers with the scaffolding they need when they need it.

Material: Q235

Our scaffolds are made of high-quality Q235 material, known for its strength and durability. This ensures that our products can withstand heavy loads and harsh weather conditions, providing a safe and reliable working platform for your workers.

Color: Steel/Spray Plastic

The Frame System Scaffolding is available in two color options - steel and spray plastic. The steel scaffolds are coated with a rust-resistant layer, making them suitable for outdoor use. The spray plastic scaffolds are coated with a durable plastic layer, providing extra protection and an attractive finish.

Shipping origin: China

All our scaffolds are manufactured and shipped from China, where we have a state-of-the-art production facility. This allows us to maintain high-quality standards and ensure timely delivery to our customers around the world.

Key Features:

Scaffold Mobile Frame: The scaffold mobile frame is the main component of the Frame System Scaffolding. It is designed to be easily assembled and disassembled, making it highly portable and versatile.

Scaffold Frame: The scaffold frame is the backbone of the scaffolding system, providing the structure and support for the working platform. Made of Q235 material, it is strong and durable.

Frame Upright: The frame upright is the vertical support of the scaffold frame. It can be adjusted to different heights, allowing for a customized working platform.

Frame Ledger: The frame ledger is the horizontal support of the scaffold frame. It connects the frame uprights and provides additional stability to the scaffolding structure.

Frame Horizontal: The frame horizontal is the crossbar that connects the frame ledgers. It helps distribute the weight evenly and adds strength to the scaffolding.

Cross Braces: The cross braces are diagonal supports that add lateral stability to the scaffolding system. They are adjustable and can be easily installed for added safety.

Overall, the Frame System Scaffolding is a reliable and efficient product that is essential for any construction project. With its customizable size, fast delivery time, and high-quality materials, it is the perfect solution for all your scaffolding needs.

Technical Parameters:

Attribute	Value
Product Name	American Frame System Scaffolding
Color	Steel/Spray Plastic
Material	Q235
Load Capacity	High
Shipping Origin	China
Size	Customized
Arrival Time	10-15 days
Product Features	American Frame System Structuring, lightweight and durable design, easy to assemble and dismantle
Key Benefits	Provides stable and secure support for construction workers, suitable for a variety of building projects
Recommended Usage	Construction sites, industrial projects, maintenance and repair work

Applications:

Bythai BM205 Frame System Scaffolding

Bythai BM205 Frame System Scaffolding is a highly versatile and efficient scaffolding solution that is suitable for a variety of construction projects. Designed and manufactured in China, this product has been certified by SGS and meets all safety standards.

The BM205 model is a popular choice among construction companies due to its ease of use and durability. It is perfect for portal frame scaffold erection and portal frame shoring, as well as other applications such as walk through scaffold system and mobile scaffolding. With its customizable size and high load capacity, it can meet the specific needs of different construction projects.

One of the main advantages of Bythai BM205 Frame System Scaffolding is its portability. It can be easily transported and assembled on site, making it an ideal choice for construction sites with limited space. Its modular design also allows for quick and easy installation, saving time and labor costs.

The safety of workers is of utmost importance at any construction site. With Bythai BM205, you can rest assured that your workers are protected. The scaffolding is made of high-quality steel and can withstand heavy loads. It also has a spray plastic coating, providing added protection against corrosion and weathering.

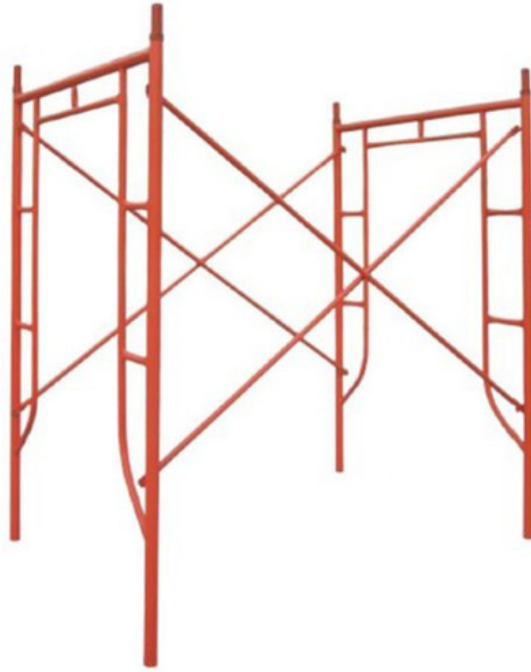

Packaging and delivery of Bythai BM205 Frame System Scaffolding is also a top priority. The scaffolding is carefully bundled to ensure safe transportation, and delivery time is guaranteed to be between 10-15 days. Payment terms can be negotiated, with TT/TC being the preferred method.

The price range for Bythai BM205 Frame System Scaffolding is between 4.5-8.5, making it a cost-effective solution for construction companies. The color options include steel and spray plastic, giving customers the freedom to choose the most suitable option for their project. The shipping origin is China, but the product can be delivered worldwide.

Overall, Bythai BM205 Frame System Scaffolding is a reliable and efficient product that can be used in a variety of construction projects. Its versatility, safety features, and durability make it a top choice for construction companies. So, whether you are building a high-rise building, a bridge, or any other structure, Bythai BM205 is the perfect scaffolding solution for you.
