Pre Galvanized Steel Scaffolding Plank Hooked Walk Board Metal Scaffolding Catwalk Plank

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Bythai
- Certification: SGS,ISO
- Model Number: BT205
- Minimum Order Quantity: 1000
- Price: 15.5-85.5
- Packaging Details: In bundles
- Delivery Time: 10-15
- Payment Terms: container, shipping, L/C, T/T

Product Specification

- Material: Steel
- Place Of Shipment: China
- Packaging: Container
- Length: Customized
- Usage: Scaffolding
- Surface: Pre-galvanized/hot Dip Galvanized/Spray Plastic
- Highlight: **Metal Catwalk Scaffolding Plank**, **Hooked Walk Board Scaffolding Plank**, **Pre Galvanized Steel Scaffolding Plank**

Product Description

Technical Parameters:

Attribute	Detail
Packaging	Container
Place of Shipment	China
Surface	Pre-galvanized/Hot Dip Galvanized/Spray Plastic
Usage	Scaffolding
Material	Steel
Length	Customized

Flexibility in sizing is a key aspect of the Scaffolding Plank's design. Understanding that projects come in all shapes and sizes, these planks are available in customized lengths to suit the unique needs of each construction site. This bespoke approach ensures that the steel staging plank can be seamlessly integrated into any scaffolding setup, contributing to safer and more efficient work environments. When it comes to usage, the Scaffolding Plank is specifically designed for use in scaffolding systems. Its robust construction makes it an ideal choice for supporting workers and materials during construction, maintenance, or repair tasks. The strength of the steel material means that these planks can withstand heavy loads and high traffic, making them a staple in the toolkit of builders and contractors. The steel plank for scaffold is an essential component, providing a secure foothold and work area for various trades in the construction industry.

The material selection for the Scaffolding Plank is critical to its performance. Made from high-grade steel, it offers superior strength and durability. The inherent qualities of steel, such as its load-bearing capacity and resistance to bending or warping, make it the material of choice for scaffolding planks. Whether in the pre-galvanized, hot-dip galvanized, or spray plastic form, this galvanized steel plank is built to last and withstand the rigors of construction work.
