Scaffolding Tube Galvanized Steel Pipe For Construction Underground Bunker Galvanized Steel Pipe

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Bythai Scaffolding
- Certification: SGS ISO
- Model Number: BT201
- Minimum Order Quantity: 1000
- Price: $10-$85
- Packaging Details: In bundles
- Delivery Time: 10-15 days
- Payment Terms: TT/TC
- Supply Ability: 1000tons per month

Product Specification

- Weight: 6.4kg/m
- Material: Galvanised Steel
- Application: Scaffolding
- Standard: EN39
- Thickness: 3.2mm
- Tensile Strength: 420N/mm2
- Name: Galvanised Scaffold Tube
- Yield Strength: 245N/mm2
- Highlight: **Underground Bunker Galvanized Steel Pipe**, **Construction Galvanized Steel Pipe**, **Scaffolding Tube Galvanized Steel Pipe**

Product Description

Product Description:

Our Galvanised Scaffold Tube is designed specifically for use in scaffolding applications. It meets all the requirements of the BS1139 standard, so you can be sure that it will stand up to the demands of your job. And with a weight of 6.4kg/m, it's easy to handle and transport.

The tube is treated with a galvanized finish to provide added protection against corrosion. This makes it ideal for use in wet or humid environments, where other materials might quickly become damaged. The surface treatment ensures that the tube will stay looking great for years to come, even after repeated use.

In addition to its use in scaffolding, our Galvanised Scaffold Tube is also suitable for a wide range of other applications. It can be used as a structural element in buildings, or as a support for pipes and cables. It's even suitable for use as a stainless steel pipe, thanks to its high-quality construction.

So if you're looking for a reliable, durable, and versatile scaffolding tube, look no further than our Galvanised Scaffold Tube. With its high-quality construction, galvanized finish, and BS1139 compliance, it's the perfect choice for any job. And at just 48.3mm in diameter, it's easy to find the right size for your needs. Order yours today and experience the difference for yourself!

Technical Parameters:

Attribute	Value
Name	Galvanised Scaffold Tube
Application	Scaffolding
Material	Galvanised Steel
Diameter	48.3mm
Thickness	3.2mm
Weight	6.4kg/m
Standard	EN39
Surface Treatment	Galvanised
Tensile Strength	420N/mm2
Yield Strength	245N/mm2

Support and Services:

Our Galvanised Scaffold Tube is manufactured to meet the highest standards of quality and safety. We offer technical support and services to ensure that our customers have access to the expertise and resources they need to use our products effectively.
Our technical support team is available to answer any questions you may have about our Galvanised Scaffold Tube, including its properties, performance, and recommended usage. We can also provide guidance on the installation and maintenance of our scaffold tubes, as well as troubleshooting advice.
