Basic Information

- Place of Origin: China
- Brand Name: Bythai
- Certification: SGS ISO
- Model Number: BT205
- Minimum Order Quantity: 1000
- Price: 10.5-35.5
- Packaging Details: In bundles
- Delivery Time: 10-15
- Payment Terms: TT/TC

Product Specification

- Arrival Time: 10-15
- Load Capacity: High
- Shipping Origin: China
- Size: Customized
- Color: Steel/Spray Plastic
- Material: Q235
- Highlight: **Q235 Steel Frame System Scaffolding, Durability Frame System Scaffolding, Heavy Loads Frame System Scaffolding**

Product Description:

The scaffolding frame system is customizable, allowing you to create a scaffolding system that meets your specific needs. This means that you can adjust the size and shape of the system to fit your workspace and ensure that it provides the necessary support for your project. The Portal Frame Shoring, Frame Upright, and other components of the system can be adjusted to suit your requirements, which makes this system highly versatile and adaptable.

One of the key features of the Frame System Scaffolding is its high load capacity. This system can support heavy loads and is designed to withstand the weight of heavy equipment and materials. This makes it a reliable choice for construction sites and other industrial applications where heavy loads are common.

The Frame System Scaffolding is made in China, ensuring that you get a high-quality product at an affordable price. The system is available in steel or spray plastic finish, which gives it a sleek and modern look. The steel finish is perfect for rugged environments, while the spray plastic finish is ideal for indoor use as it is less prone to rust and corrosion.

The scaffolding system is easy to assemble and disassemble, which makes it perfect for projects that require frequent adjustments. The components of the system are designed to fit together seamlessly, ensuring that your scaffolding is stable and secure. The system is also easy to transport, which makes it ideal for projects that require you to move your scaffolding from one location to another.

In conclusion, the Frame System Scaffolding is a versatile and reliable scaffolding system that is perfect for construction sites, renovation projects, and other industrial applications. With its high load capacity, customizable size, and durable materials, this system is designed to meet the needs of any project. If you are looking for a scaffolding system that is easy to assemble, transport, and adjust, the Frame System Scaffolding is the perfect choice for you.
